

MINTVIZOR **Flexible IIoT platform for manufacturing and industrial analytics applications**

Connect to devices and applications, explore the out-of-the-box advanced analytics solutions, and employ the flexibility to build and extend your own IoT applications to solve specific business needs with speed and efficiency.

Experience agility and flexibility in rapid application development

Device Connectivity

Support for all shop floor assets and sensors, automated managed gateway

Data Transformation

Realtime rules engine, ML, and AI transform equipment data, building Data Foundation

Integration and Extensibility

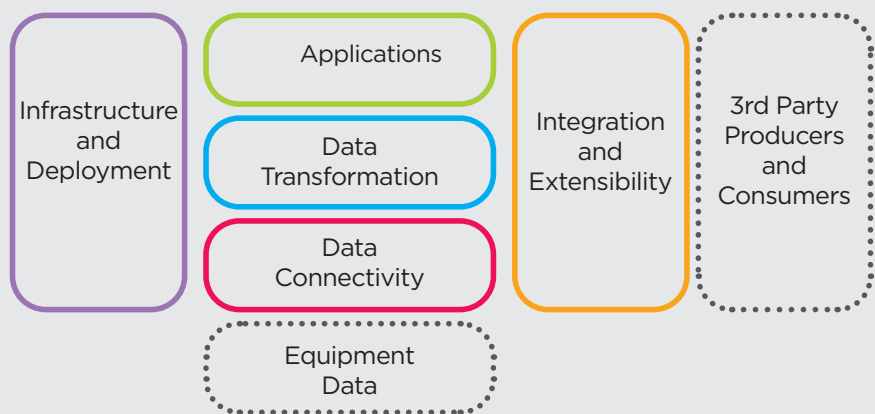

Integrate, extend, and build your own solutions using APIs, SDKs, Libraries, Connectors

Application Framework

Out-of-the-box application framework to drive value from Day 1

Infrastructure and Deployment

Flexible deployment: on-premise, private cloud, public cloud

Capability Architecture

Deliver business outcomes with **MINTVIZOR IIoT Platform**

- **Realize value today** - Pre-built, industrial domain-driven analytics delivers immediate performance improvement
- **Advanced industrial solutions** Innovate and transform with smart manufacturing, digital twin, connected products, and on-demand manufacturing applications
- **Flexible deployment** - Leverage your preferred technology for speed and cost efficiency
- **Modular platform consumption** - Procure only what you need and when you need it

Capabilities:

- Enables rapid custom development and deployment of new industrial IoT/IIoT applications with Developer tools and Data Science Toolkits.
- Distributed platform with flexible, scalable deployment at the edge, on-premise (data centers), in the cloud or in hybrid environments
- Modern distributed micro-service architecture, with containerized deployment and robust Continuous Delivery and Deployment (CI/CD) pipeline
- Interoperate with internal business applications and external partners, extending industrial processes to the supply chain for process and workflow automation

Leverage **MINTVIZOR IIoT Platform** to build your smart manufacturing and industrial applications.

Asset Utilization & Performance Management

Digital transformation unlocks the potential of your asset, improving reliability and availability of physical assets while minimizing risk and operating costs

Predictive Maintenance

Analyze your machine data to diagnose, predict and avoid failures and damages to your machine equipment's

On Demand Manufacturing

Enabling on demand manufacturing with real time visibility and insights into your assets and production line across the entire manufacturing supply chain

Remote Asset Monitoring

Get real time visibility into what's happening in your plants in multiple locations from anywhere and anytime

Additive Manufacturing Optimization

Improve 3D printer availability, capacity planning, up-time, yields and manage conditions that effect product quality

Hello there! I am an Ideapreneur. I believe that sustainable business outcomes are driven by relationships nurtured through values like trust, transparency and flexibility. I respect the contract, but believe in going beyond through collaboration, applied innovation and new generation partnership models that put your interest above everything else. Right now 150,000+ Ideapreneurs are in a Relationship Beyond the Contract™ with 500 customers in 49 countries. **How can I help you?**

HCL
